

# MACH 1 HVLP

The MACH 1 is a full size HVLP spray gun with special nozzles and modifications that allow it to operate at high transfer efficiencies in compliance with the California South Coast Air Quality Management District (SCAQMD) regulations as a high volume low pressure (HVLP) air spray gun.

Constructed of a lightweight drop-forged aluminum body and stainless steel fluid passages, including long life self-adjusting packings, this spray gun is designed to stand up under hard, continuous use. It operates like a conventional spray system utilizing compressed shop air.

## Technical Specifications

Body: ..... Drop-forged aluminum  
Weight: ..... 20.1 Oz.  
Air Inlet: ..... 1/4" NPS (m)  
Fluid Inlet: ..... 3/8" NPS (m)  
Fluid Passages: ..... Stainless Steel  
Feed Type: ..... Pressure / Siphon Feed  
Part Sheet: ..... 77-2463  
Gun Repair Kit: ..... 54-3605

## Most Popular Nozzle Set Ups:

MACH 1 94 - 94P  
MACH 1 94 - 93P  
MACH 1 92 - 94P  
MACH 1 91 - 94P  
Standard Fluid Nozzle and Needle are 303 Stainless Steel

See page 15 for additional standard and specialty fluid nozzle recommendations.
