

Products: RL (formerly RimCell Select LP)

Advanced features and a configurable platform

Gusmer-Decker's RL metering and dispensing unit is designed for products requiring low-pressure static or dynamic mixing.

Available in low-pressure and high-pressure (see RC) versions.

Features and Benefits

- Wide range of flow rates
- Hot water or solvent purge - making maintenance and cleanup easier
- Highly efficient mixing for parts consistency and repeatability
- Easy-to-use Allen Bradley controls
- RexRoth pumps for precision and reliability
- Compatible with most non-corrosive and corrosive materials
